

Design Adjustment Application

**DEVELOPMENT
SERVICES
DEPARTMENT**

The purpose of this request is to seek a Design Adjustment from the Development Services Director, or designee, for a specific project only and, if granted, may be approved with special conditions and provisions.

This application and all further action shall be consistent with Section 10.2.18 in the Unified Development Ordinance (UDO). The consideration and decision of this request shall be based solely on the conformance of the findings, as outlined in Sec. 8.3.6, Sec. 8.4.1.E and Sec. 8.5.1.G of the UDO or the Raleigh Street Design Manual.

| | <input type="checkbox"/> Raleigh Street Design Manual | - See page 5 for findings | |
| | Provide details about the request; (please attach a memorandum if additional space is needed): | | |
| The proposed 506 Jones Franklin Road Subdivision creates 5 R-6 lots from an existing corner lot fronting on Jones Franklin Road and Barringer Drive. Two new lots will face Jones Franklin and two new lots will face Barringer. One lot is a corner lot. The block containing the new subdivision contains multiple zonings. The most restrictive block perimeter maximum length is 3,000 to 8,000 feet. The existing block perimeter is approximately 15,280 feet in length. Nearly all property within the block is fully developed, with various uses from single family residential to apartment uses. There are several dead-end streets or looped streets within the block, that if extended, would have created a much shorter block perimeter. Due to development approved in the past by the City of Raleigh, the existing block perimeter was created. A Design Adjustment is deemed reasonable, meeting conditions 2,3, and 6 of UDO Section 8.3.6.E. | | | |

It is the responsibility of the applicant to provide all pertinent information needed for the consideration of this request. Applicant must be the Property Owner.

By signing this document, I hereby acknowledge the information on this application is, to my knowledge, accurate.

Article 8.3, Blocks, Lots, Access

Administrative Design Adjustment Findings

DEVELOPMENT
SERVICES
DEPARTMENT

The Development Services Director may in accordance with *Sec. 10.2.18*, approve a design adjustment, subject to all of the following findings. Describe how each item is met:

- A. The requested design adjustment meets the intent of this Article;
The proposed subdivision creates lots at the intersection of two existing streets. Vehicle and pedestrian access is provided via the street frontage.
- B. The requested design adjustment conforms with the Comprehensive Plan and adopted City plans;
The proposed subdivision is single family residential according to the current zoning. Further, additional right of way will be dedicated on Jones Franklin Road for future improvement of the street which will allow construction of a street section per the City plans.
- C. The requested design adjustment does not increase congestion or compromise Safety;
The proposed subdivision creates two lots facing Barringer Drive, two lots facing Jones Franklin Road, and one corner lot. The trips generated by the additional lots will not significantly increase traffic volume. Emergency vehicle access is provided via Barringer or Jones Franklin.
- D. The requested design adjustment does not create any lots without direct street Frontage;
All proposed lots have street frontage for direct street access.
- E. The requested design adjustment is deemed reasonable due to one or more of the following:
1. Topographic changes are too steep;
 2. The presence of existing buildings, stream and other natural features;
 3. Site layout of developed properties;
 4. Adjoining uses or their vehicles are incompatible;
 5. Strict compliance would pose a safety hazard; or
 6. Does not conflict with an approved or built roadway construction project
 7. adjacent to or in the vicinity of the site.
- 2 & 3. The proposed subdivision adjoins an existing apartment complex with no opportunity to connect to a public street. The existing block is almost completely built out with existing streets configured such that additional extensions or connections are precluded. The proposed subdivision can gain street access for all lots from existing streets without new street construction. A new street across the subject property would create an extremely small block with no benefit for traffic or pedestrian circulation. Therefore, no new street is proposed.**
- 6. To our knowledge, there are no current plans for construction on Jones Franklin Road or Barringer Drive. The proposed subdivision provides additional right of way for Jones Franklin Road. The additional right of way associated with the subdivision will benefit any future construction.**
